SUMMARY

Software Engineer with 2+ years of experience designing, building, and operating production backend and full-stack systems. Strong in Java, Spring Boot, microservices, RESTful APIs, and event-driven services, with frontend experience using React.js. Hands-on with C for bare-metal and systems-level programming, and experienced with Linux, AWS, Docker, Kubernetes, CI/CD, automated testing, debugging, and performance optimization. Proven track record of resolving production issues, reducing latency, and shipping reliable, high-quality software.

SKILLS

Languages:	Java, JavaScript, Python, C, C++, HTML, CSS
Frameworks and Databases:	Spring Boot, React.js, FastAPI, PostgreSQL, MongoDB (NoSQL)
Backend Architecture:	Microservices, Distributed Systems, RESTful APIs, CI/CD
Cloud & DevOps:	Linux, AWS, Git, Docker, Kubernetes, Terraform, Kafka, Redis
AI Tools:	Claude-Code, Agentic Workflow, LLM, RAG, LangChain, pgvector, OpenClaw

EXPERIENCE

Full-Stack Developer | Saayam for All, USA Apr 2026 – Present

- Develop and maintain Spring Boot microservices and REST APIs for the Request platform, using PostgreSQL, role-based access control, logging, and error handling.
- Developed a high-performance React.js frontend for the Request platform, optimizing rendering times by 20%.
- Build and run cloud deployment pipelines on AWS using Docker, Kubernetes, and GitHub Actions CI/CD.

Application Developer Associate | Accenture, India Aug 2021 – Oct 2022

- Developed and maintained Java Spring Boot microservices and REST APIs for enterprise applications, improving backend performance and scalability by 25%.
- Built and improved Jenkins CI/CD pipelines with Docker and automated testing, reducing deployment time by 15% and making releases more reliable.

Application Developer Intern | Masycoda Solutions, India Mar 2021 – Aug 2021

- Optimized Java Spring Boot microservices using JPA, database query tuning, indexing, and caching strategies, improving query performance and reducing database load by 40% under high-traffic workloads.
- Designed and implemented secure, scalable REST APIs with JWT-based authentication and authorization, improving API security while reducing response times by 25% through backend and request-processing optimizations.

PROJECTS

HIPAA-Compliant Medical Records Management System

- Built a full-stack application using React.js, Spring Boot, PostgreSQL, with Role-Based Access Control, AES encryption at rest, tamper-resistant audit logs, and secure file sharing, strengthening backend security and reliability.
- Automated end-to-end CI/CD on Jenkins + Docker with multi-stage builds and automated test gates. Deployed to AWS EKS (Kubernetes) with CloudFront CDN, reducing release cycles to a single merge.

RAG-Based Customer Support Chatbot

- Built a document ingestion and retrieval pipeline (LangChain, OpenAI embeddings, pgvector) that chunks source documents, generates embeddings, and serves context-aware answers through vector similarity search with metadata.
- Designed the serving layer as a containerized FastAPI backend with a React frontend, deployed on AWS via Docker, adding response caching and structured logging to cut repeat-query latency and simplify debugging of retrieval failures.

E-Commerce Platform with DevOps Automation

- Built a four-service Spring Boot platform (catalog, cart, orders, users) on PostgreSQL with per-service schemas for fault isolation and independent scaling, communicating over REST APIs with a React frontend consuming a unified gateway.
- Automated end-to-end delivery on Jenkins and Docker with multi-stage builds and automated test gates, deploying to AWS EKS with CloudFront CDN and rolling updates, reducing release cycles to a single merge.

EDUCATION

M.S. in Computer Science | California State University, Fullerton, CA, USA (GPA 3.66) Dec 2025

Software Engineering, Data Structures, Algorithms, Neural Networks, Computer Networks & Security

B.Tech in Computer Science and Engineering | MIT ADT University, Pune, MH, India Aug 2021

Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Architecture
