SUMMARY

Software Engineer with 2+ years designing, coding, and operating production backend systems and infrastructure at scale. Strong in Java, C, and Python on Linux across the full software lifecycle, design, test automation, problem determination, bug fixing, and performance analysis. Hands-on with microservices, distributed systems, CI/CD, and hybrid cloud (AWS, Docker, Kubernetes). Proven record of debugging production issues, improving latency and reliability, and quickly learning new tools to ship high-quality code.

SKILLS

Languages:	Java, C, C++, Python, JavaScript, Bash, SQL
Frameworks and Databases:	Spring Boot, FastAPI, React, PostgreSQL, MongoDB
Backend & Architecture:	Microservices, Distributed Systems, RESTful APIs, CI/CD
Cloud & DevOps:	Linux, Git, AWS (EKS, CloudFront), Docker, Kubernetes, Terraform, Jenkins, Redis, Kafka
AI Tools:	Agentic Workflow, LLM, RAG, LangChain, pgvector

EXPERIENCE

Full-Stack Developer | Saayam For All, USA Apr 2026 – Present

- Design, code, and operate production Spring Boot REST services and microservices with role-based access control, PostgreSQL integration, structured logging, and robust error handling, shipping well-tested code for request, volunteer, and user-management systems serving live users.
- Build and run hybrid-cloud deployment pipelines on AWS using Docker, Kubernetes, and GitHub Actions CI/CD, improving scalability, deployment reliability, and application performance in a 24x7 production environment.
- Write Bash and Linux automation to streamline build, packaging, and deployment across environments, reducing manual operational steps and improving release consistency.

Application Developer | Masycoda Solutions, India Nov 2022 – Aug 2023

- Performed problem determination and performance analysis on a distributed finance platform, improving P95 latency by 25% by profiling slow SQL queries, adding database indexes, and implementing Redis caching in a Spring Boot backend under peak load.
- Built a Python log-analysis pipeline that parses structured production logs, classifies failures, and triggers real-time alerts via scheduled jobs, cutting payment-failure investigation time by ~40% and improving observability.

Application Developer Associate | Accenture, India Jul 2021 – Oct 2022

- Improved performance, scalability, and fault isolation by ~25% by building Spring Boot microservices, optimizing REST API workflows, and strengthening backend service-to-service communication across enterprise production systems.
- Reduced deployment time by ~15% and improved release reliability by building and optimizing Jenkins CI/CD pipelines with Docker-based containerized builds, automated tests, and streamlined deployment workflows.
- Collaborated cross-functionally in Agile/Scrum teams, using JIRA for sprint planning, issue tracking, and code review to evaluate trade-offs and ship incremental improvements of increasing complexity.

PROJECTS

E-Commerce Platform with DevOps Automation

- Developed a microservice platform (catalog, cart, orders, users) on Spring Boot + PostgreSQL with a React frontend, using REST APIs and per-service schemas for fault isolation and independent scaling.
- Automated end-to-end CI/CD on Jenkins + Docker with multi-stage builds and automated test gates; deployed to AWS EKS (Kubernetes) with CloudFront CDN, reducing release cycles to a single merge.

HIPAA-Compliant Medical Records Management System

- Built a full-stack application (React.js, Spring Boot, PostgreSQL) with Role-Based Access Control, AES encryption at rest, system-wide immutable audit logs, and secure file sharing, strengthening backend security and reliability.

RAG-Based Customer Support Chatbot

- Designed an end-to-end Retrieval-Augmented Generation chatbot (LangChain, OpenAI APIs, PostgreSQL/pgvector) for context-aware, document-grounded responses; deployed a containerized React + FastAPI service on AWS with Docker.

EDUCATION

M.S. in Computer Science | California State University, Fullerton (GPA 3.66) Dec 2025

Software Engineering, Data Structures, Algorithms, Neural Networks, Computer Networks & Security

B.Tech in Computer Science and Engineering | MIT ADT University, Pune Aug 2021

Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Architecture
